

Measuring for your roller blind is easy- just choose where you will fit your blind and then follow the guide below

There are two positions you can fit your window blind - it is important that you let us know which way you will fit your blind and measure correctly.

OPTION 1 Inside the window recess - RECESS FITTING

Write your measurements here

	Width ↔	Drop ↕
Blind 1		
Blind 2		
Blind 3		
Blind 4		

- Make sure your recess is large enough for the roller blind – (We recommend the recess is at least 65mm deep)
- Measure within the recess horizontally in three places as indicated **A**. Note the smallest measurement as your **RECESS WIDTH**. See note about **cloth width** below.
- Measure vertically within the recess in three places as indicated **B**. Note the smallest measurement as your **RECESS DROP**.
- Note which side of the blind you would like your control chain, **LEFT** or **RIGHT** as you look at the blind.
- **IMPORTANT: CLOTH WIDTH**
When we make your roller blind we will cut the fabric so that it is 35mm less than the **RECESS WIDTH** you give us to allow space in the window recess for the roller blind controls and brackets -(25mm at the control chain end, 10mm at the other end). If there are obstructions in your window recess which would still impede the fabric of the roller blind when being lowered (eg. tiling, dado rail or phone socket) then please make an appropriate adjustment to your **RECESS WIDTH** measurement.

Top measuring tips

- Make sure you measure in at least three places for both **WIDTH** and **DROP**
- Use a metal tape measure – cloth tapes stretch!
- Always record the **WIDTH** first and the **DROP** second to avoid confusion
- Use the boxes below to record your measurements

OPTION 2 Outside the window recess - EXACT FITTING

Write your measurements here

	Width ↔	Drop ↕
Blind 1		
Blind 2		
Blind 3		
Blind 4		

- Measure horizontally in three places as indicated **A**. for the width you want your roller blind to be including overlaps (we recommend at least 37.5mm on all sides). Note the largest measurement as your **EXACT WIDTH**. See note about cloth **width** below.
- Measure vertically in three places as indicated **B**. including overlaps (we recommend at least 37.5mm on all sides). Note the largest measurement as your **EXACT DROP**.
- Note which side of the blind you would like your control chain, **LEFT** or **RIGHT** as you look at the blind.
- **IMPORTANT: CLOTH WIDTH**
When we make your roller blind we will cut the fabric so that it is the **EXACT WIDTH** you give us. Remember you will need space for the roller blind controls and brackets at the top of the blind in addition to this-(25mm at the control chain end, 10mm at the other end).
